

Dhruva Aher

Tempe, AZ | (602) 750-9542 | daher@asu.edu | [linkedin.com/in/dhruva-aher](https://www.linkedin.com/in/dhruva-aher) | github.com/Dhruva-Aher

SUMMARY

Computer Science student at Arizona State University with experience building scalable backend systems, REST APIs, and AI-integrated applications using Python, Java, and React. Strong foundation in data structures, algorithms, object-oriented programming, and full-stack software development.

EDUCATION

ARIZONA STATE UNIVERSITY

Expected May 2029

Bachelor of Science in Computer Science | Grand Challenges Scholars Program | GPA: 4.0/4.0

Tempe, AZ

- **Relevant Coursework:** Data Structures & Algorithms, Discrete Mathematics, Object-Oriented Programming, Principles of Programming.
- **Honors:** Dean's List (Fall 2025).

ABU DHABI INDIAN SCHOOL

April 2017 – May 2025

High School Diploma

Abu Dhabi, UAE

- **Relevant Coursework:** Computer Science (Python), Database Management Systems (DBMS), Data Structures, Computer Networks.

TECHNICAL SKILLS

Languages: Python, Java, JavaScript, SQL (MySQL)

Backend Development: Flask, REST API Development, JSON, HTTP, CRUD Operations

Frontend Development: React.js

AI & API Integration: OpenAI API, Google Gemini API, Supermemory API, Computer Vision APIs

Tools & Platforms: Git, GitHub, Linux, Raspberry Pi, VSCode, AWS

Core Competencies: Data Structures, Algorithms, Object-Oriented Programming, Debugging

PROJECTS

LaundryLens – Assistive Wearable Device

Software Developer — FSE 100 Engineering Design Project

August 2025 – December 2025

- Developed computer vision application in Python on Raspberry Pi to classify 15+ clothing attributes with 90%+ accuracy for assistive technology use.
- Integrated OpenAI Vision API and implemented real-time image processing and text-to-speech pipeline achieving sub-2 second end-to-end latency.
- Optimized hardware-software integration by resolving 10+ GPIO wiring and sensor calibration issues across 8 iterative development cycles.
- **Technologies:** Python, Raspberry Pi, OpenAI API, Computer Vision, GPIO, Linux

AI Productivity Assistant

Full-Stack Developer — SunHacks 2025 Hackathon

September 2025

- Built full-stack web application in 36 hours automating scheduling, email drafting, and task management from natural language input; processed 50+ test queries with 85%+ intent classification accuracy.
- Designed and implemented RESTful backend in Flask with 2 API endpoints handling structured JSON payloads and concurrent user requests.
- Developed responsive React.js frontend with state management and real-time API-driven rendering of responses.
- **Technologies:** Python, Flask, React.js, JSON, HTTP, Google Gemini API, Git

Icebreaker AI

Frontend Developer — DevHacks 2025 Hackathon

September 2025

- Developed interactive frontend using Python Flet framework enabling real-time chat interface with sub-1 second response latency.
- Integrated backend API responses into UI and implemented session-based rendering for multi-turn conversations.
- Collaborated with backend teammate to connect external API integrations including Google Gemini and Supermemory APIs.
- **Technologies:** Python, Flet, Google Gemini API, Supermemory API

RESEARCH

AR Glasses for Dementia Patients | *FSE 150 Grand Challenges Research Project*

August 2025 – December 2025

- Analyzed augmented reality system architecture integrating computer vision, sensors, and AI processing components for assistive technology applications.
- Evaluated feasibility of AI-driven facial recognition and memory support in resource-constrained wearable systems.

EXPERIENCE

Youth Ambassador | *Lifology Career Counseling Program*

June 2022 – June 2023

- Coordinated and delivered virtual STEM workshops reaching 10,000+ students across India.
- Managed nationwide digital participation initiatives across 27,000 schools supporting career readiness programs.
- Facilitated sessions with professionals from NASA, United Nations, and Google Cloud.

LEADERSHIP & INVOLVEMENT

- **SoDA x AI Society Bootcamp:** Completed technical bootcamp covering full-stack development, REST API integration, and collaborative Git workflows.
- **Hackathons:** Participated in SunHacks and DevHacks (2025); delivered functional MVPs under strict 36-hour development timelines.
