EDUCATION

Arizona State University, Grand Challenges Scholars Program

Tempe, AZ | Aug 2025 – Expected Dec 2028

Bachelor of Science in Computer Science (Sophomore)

GPA: 4.0/4.0

Coursework: Data Structures & Algorithms, Object-Oriented Programming, Discrete Mathematics, Calculus III

Honors: Dean's List (Fall 2025, Spring 2026)

EXPERIENCE & LEADERSHIP

Arizona State University – Undergraduate Learning Assistant, CSE 110

Tempe, AZ | Aug 2026 – Present

- Mentor **100+** students in weekly Java labs, helping them translate requirements into design, code, testing, and independent debugging.
- Tailor explanations to each student's level by turning assignment requirements into targeted debugging questions.

ACM at ASU – Coordinator, Administration

Tempe, AZ | Mar 2026 – Present

- Coordinated GlobeHacks 2026 (**250+** attendees) across Devpost setup, live Discord support, and technical and non-technical tracks.
- Manage a **300+** member Discord (**4,500+** member club) and co-organize workshops and speaker sessions of **30–40** students each.

PROJECTS

Aura – Distributed Job Queue

[Live demo](#) | [GitHub](#)

TypeScript, Node.js, React, Redis, PostgreSQL, Docker

- Restored **6,000** pending jobs in **1.84 seconds** in a local Redis-wipe test by designing leader-elected recovery that rebuilds Redis from durable PostgreSQL state.
- Validated reliability with **224** Vitest tests covering job failures, retries, recovery, and concurrent workers.
- Built a React operator console that streams queue depth, P95 latency, and worker health live over server-sent events.

FlowBoard – Multi-Tenant Collaboration Platform

[Live demo](#) | [GitHub](#)

Python, FastAPI, React, PostgreSQL, Redis, WebSockets

- Built secure real-time collaboration where each team's data stays private to its workspace: non-members get HTTP **403** on workspace and document endpoints, and WebSocket outsiders are rejected before accept.
- Turned product requirements into authorization checks and correct Kanban ordering, validated by **68** pytest cases and CI.

ACM Hub – Opportunity Discovery Discord Bot

ACM at ASU

Python, discord.py, PostgreSQL, SQLAlchemy, APScheduler, Docker

- Surfaced **~3,700** internships and **68** ASU research mentors from **3** sources through an eight-stage pipeline that members browse via private slash commands.
- Designed an officer-approval gate so nothing posts publicly until reviewed, with batch caps and a first-run baseline so reviewers aren't flooded with thousands of cards.

Receipts – AI Agent Claim Verification Tool

[GitHub](#)

React, Node.js, Vite, Git

OpenAI Build Week | Jul 2026

- Built a developer tool for engineers deciding whether an AI agent's pull request is safe to merge, turning agent summaries into checkable claims verified against command output and Git diffs.
- Designed a deterministic verdict engine (MERGE/FIX/RE-RUN/ESCALATE) that limits AI to claim extraction, validated by **19** passing pipeline tests.

TECHNICAL SKILLS

Languages: Python, Java, TypeScript, JavaScript, SQL, HTML/CSS

Web & Backend: React, Next.js, Node.js, FastAPI, REST APIs, WebSockets, JWT/RBAC

Data & AI: PostgreSQL, MongoDB, Redis, Vertex AI, Gemini API, OpenAI API

Cloud & DevOps: Azure, GCP, Docker, GitHub Actions, CI/CD, Linux

Certifications: AWS Cloud Practitioner | Microsoft Azure AI Essentials Professional
